

*Looking for ways to keep your lawn healthy?  
Why not have your lawn aerated.*

Core Aeration is an important step in maintaining a healthy lawn!

- ✓ Eco-friendly alternative
- ✓ Prepares soil for seeding
- ✓ Strengthens grass roots
- ✓ Breaks down thatch layer, reducing weeds and bug infestation
- ✓ Allows oxygen, nutrients, and water to reach the root zone

Best times to aerate are Spring and Fall.

*For affordable lawn care and courteous service,  
call Thirsty's Lawn Care.*
